

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_GSA_1A

Name(s) of Testers: Bethany Freeman

Test Description: Ensuring getSeatAllocation()
function works as intended

**Indicate where are you storing the tests (what file)
and the name of the method/functions being used.**
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A ResultsDataCPL object has been created

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList seatAlloc	seatAlloc = new ArrayList<>();	Object was created successfully	Object was created successfully	
2	Add items to seatAlloc	seatAlloc.add(new ArrayList<>(Arrays.asList("Dem", new int[] { 2, 0 }))); seatAlloc.add(new ArrayList<>(Arrays.asList("Rep", new int[] { 0, 1 })));	Items added successfully	Items added successfully	
3	Assert that the ResultDataCPL object 'test' returns the proper seatAllocation when using the getSeatAllocation when compared to seatAlloc	assertEquals(seatAlloc, test.getSeatAllocation());	True	True	

Post condition(s) for Test:

getSeatAllocation() returns an ArrayList equal to seatAlloc

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_GRV_2A

Name(s) of Testers: Bethany Freeman

Test Description: Ensuring getRemainingVotes()
function works as intended

**Indicate where are you storing the tests (what file)
and the name of the method/functions being used.**
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A ResultsDataCPL object has been created

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList remainVotes	remainVotes = new ArrayList<>();	Object was created successfully	Object was created successfully	
2	Add items to remainVotes	remainVotes.add(new ArrayList<>(Arrays.asList("Dem", 84))); remainVotes.add(new ArrayList<>(Arrays.asList("Rep", 250)));	Items added successfully	Items added successfully	
3	Assert that the ResultDataCPL object 'test' returns the proper seatAllocation when using the getSeatAllocation when compared to remainVotes	assertEquals(remainVotes, test.getRemainingVotes());	True	True	

Post condition(s) for Test:

getRemainingVotes() returns an ArrayList equal to remainVotes

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_GFWO_3A

Name(s) of Testers: Bethany Freeman

Test Description: Ensuring getFinalWinOrder()
function works as intended

**Indicate where are you storing the tests (what file)
and the name of the method/functions being used.**
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A ResultsDataCPL object has been created

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList finalWinOrder	seatAlloc = new ArrayList<>();	Object was created successfully	Object was created successfully	
2	Add items to finalWinOrder	finalWinOrder.add(new ArrayList<>(Arrays.asList("Dem", "Sarah", 1))); finalWinOrder.add(new ArrayList<>(Arrays.asList("Dem", "Bob", 2))); finalWinOrder.add(new ArrayList<>(Arrays.asList("Rep", "Craig", 3)));	Items added successfully	Items added successfully	
3	Assert that the ResultDataCPL object 'test' returns the proper seatAllocation when using the getSeatAllocation when compared to finalWinOrder	assertEquals(finalWinOrder, test.getFinalWinOrder());	True	True	

Post condition(s) for Test:

getFinalWinOrder() returns an ArrayList equal to finalWinOrder

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_GPWO_4A

Name(s) of Testers: Bethany Freeman

Test Description: Ensuring getPartyWinOrder()
function works as intended

**Indicate where are you storing the tests (what file)
and the name of the method/functions being used.**
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A ResultsDataCPL object has been created

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList partyWinOrder	partyWinOrder = new ArrayList<>(Arrays.asList("Dem", "Dem", "Rep"));	Object was created successfully	Object was created successfully	
3	Assert that the ResultDataCPL object 'test' returns the proper seatAllocation when using the getSeatAllocation when compared to partyWinOrder	assertEquals(remainVotes, test.getPartyWinOrder());	True	True	

Post condition(s) for Test:

getPartyWinOrder() returns an ArrayList equal to partyWinOrder

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_CWO_5A

Name(s) of Testers: Bethany Freeman

Test Description: Ensuring computeWinOrder()
function works as intended when the partyWinOrder
is empty

**Indicate where are you storing the tests (what file)
and the name of the method/functions being used.**
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A FileData object has been created

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList partyWinOrder	partyWinOrder = new ArrayList<>();	Object was created successfully	Object was created successfully	
2	Create new ArrayList finalWinOrder	ArrayList<ArrayList<Object>> finalWinOrder = new ArrayList<>();	Object was created successfully	Object was created successfully	
3	Create a new ArrayList seatAlloc	seatAlloc = new ArrayList<>();	Object was created successfully	Object was created successfully	
4	Add items to seatAlloc	seatAlloc.add(new ArrayList<>(Arrays.asList("Dem", new int[] { 2, 0 }))); seatAlloc.add(new ArrayList<>(Arrays.asList("Rep", new int[] { 0, 1 })));	Items added successfully	Items added successfully	

5	Create a new ArrayList remainVotes	remainVotes = new ArrayList<>();	Object was created successfully	Object was created successfully	
6	Add items to remainVotes	remainVotes.add(new ArrayList<>(Arrays.asList("Dem", 84))); remainVotes.add(new ArrayList<>(Arrays.asList("Rep", 250)));	Items added successfully	Items added successfully	
7	Initialize a new ResultsDataCPL object	test = new ResultsDataCPL(seatAlloc, remainVotes, partyWinOrder, testFile);	Object was created successfully	Object was created successfully	
7	Assert that the ResultDataCPL object 'test' used the computeWinOrder() method to properly instantiate the finalWinOrder field	assertEquals(finalWinOrder, test.getFinalWinOrder());	True	True	

Post condition(s) for Test:

computeWinOrder() created an ArrayList which was equivalent to finalWinOrder

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_CWO_5B

Name(s) of Testers: Bethany Freeman

Test Description: Ensure an IOException is thrown when one party has more votes than it's supposed to

Indicate where are you storing the tests (what file) and the name of the method/functions being used.
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A FileData object has been created, testFile

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList partyWinOrder	partyWinOrder = new ArrayList<>(Arrays.asList("Rep", "Rep", "Rep"));	Object was created successfully	Object was created successfully	
2	Create a new ArrayList seatAlloc	seatAlloc = new ArrayList<>();	Object was created successfully	Object was created successfully	
3	Add items to seatAlloc	seatAlloc.add(new ArrayList<>(Arrays.asList("Dem", new int[] { 2, 0 }))); seatAlloc.add(new ArrayList<>(Arrays.asList("Rep", new int[] { 0, 1 })));	Items added successfully	Items added successfully	
4	Create a new ArrayList remainVotes	remainVotes = new ArrayList<>();	Object was created successfully	Object was created successfully	
5	Add items to remainVotes	remainVotes.add(new ArrayList<>(Arrays.asList("Dem", 84))); remainVotes.add(new ArrayList<>(Arrays.asList("Rep", 250)));	Items added successfully	Items added successfully	

6	Initialize a new ResultsDataCPL object and assert that an IOException is thrown	assertThrows(IOException.class, () -> test = new ResultsDataCPL(seatAlloc, remainVotes, partyWinOrder, testFile));	IOException thrown	IOException thrown	
---	---	--	--------------------	--------------------	--

Post condition(s) for Test:

computeWinOrder() throws an IOException when trying to create a ResultsDataCPL file with an invalid win order

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_CWO_5C

Name(s) of Testers: Bethany Freeman

Test Description: Ensure computeWinOrder() works properly under normal circumstances

Indicate where are you storing the tests (what file) and the name of the method/functions being used.
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A FileData object has been created, testFile

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList partyWinOrder	partyWinOrder = new ArrayList<>(Arrays.asList("Rep", "Rep", "Rep"));	Object was created successfully	Object was created successfully	
2	Create a new ArrayList seatAlloc	seatAlloc = new ArrayList<>();	Object was created successfully	Object was created successfully	
3	Add items to seatAlloc	seatAlloc.add(new ArrayList<>(Arrays.asList("Dem", new int[] { 2, 0 }))); seatAlloc.add(new ArrayList<>(Arrays.asList("Rep", new int[] { 0, 1 })));	Items added successfully	Items added successfully	
4	Create a new ArrayList remainVotes	remainVotes = new ArrayList<>();	Object was created successfully	Object was created successfully	

5	Add items to remainVotes	remainVotes.add(new ArrayList<>(Arrays.asList("Dem", 84))); remainVotes.add(new ArrayList<>(Arrays.asList("Rep", 250)));	Items added successfully	Items added successfully	
6	Initialize a new ResultsDataCPL object 'test'	test = new ResultsDataCPL(seatAlloc, remainVotes, partyWinOrder, testFile);	Object was created successfully	Object was created successfully	
7	Create new ArrayList finalWinOrder	finalWinOrder = new ArrayList<>();	Object was created successfully	Object was created successfully	
8	Add items to finalWinOrder	finalWinOrder.add(new ArrayList<Object>(Arrays.asList("Dem", "Sarah", 1))); finalWinOrder.add(new ArrayList<Object>(Arrays.asList("Rep", "Craig", 2)));	Items added successfully	Items added successfully	
9	Assert that the finalWinOrder ArrayList is equal to test.getFinalWinOrder()	assertEquals(finalWinOrder, test.getFinalWinOrder());	True	True	

Post condition(s) for Test:

test.getFinalWinOrder() is equivalent to finalWinOrder

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_CWO_5D

Name(s) of Testers: Bethany Freeman

Test Description: Ensure computeWinOrder()
handles the case where duplicate names around found
across different parties

**Indicate where are you storing the tests (what file)
and the name of the method/functions being used.**
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass Fail X

Preconditions for Test: A FileData object has been created, testFile

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create a new ArrayList partyWinOrder	partyWinOrder = new ArrayList<>(Arrays.asList("Dem", "Rep"));	Object was created successfully	Object was created successfully	
2	Create a new ArrayList seatAlloc	seatAlloc = new ArrayList<>();	Object was created successfully	Object was created successfully	
3	Add items to seatAlloc	seatAlloc.add(new ArrayList<>(Arrays.asList("Dem", new int[] { 2, 0 }))); seatAlloc.add(new ArrayList<>(Arrays.asList("Rep", new int[] { 0, 1 })));	Items added successfully	Items added successfully	
4	Create a new ArrayList remainVotes	remainVotes = new ArrayList<>();	Object was created successfully	Object was created successfully	

5	Add items to remainVotes	remainVotes.add(new ArrayList<>(Arrays.asList("Dem", 84))); remainVotes.add(new ArrayList<>(Arrays.asList("Rep", 250)));	Items added successfully	Items added successfully	
6	Initialize a new ResultsDataCPL object 'test'	test = new ResultsDataCPL(seatAlloc, remainVotes, partyWinOrder, testFile);	Object was created successfully	Object was created successfully	
7	Create new ArrayList finalWinOrder	finalWinOrder = new ArrayList<>();	Object was created successfully	Object was created successfully	
8	Add items to finalWinOrder	finalWinOrder.add(new ArrayList<Object>(Arrays.asList("Dem", "Sarah", 1))); finalWinOrder.add(new ArrayList<Object>(Arrays.asList("Rep", "Craig", 2)));	Items added successfully	Items added successfully	
9	Assert that the finalWinOrder ArrayList is equal to test.getFinalWinOrder()	assertEquals(finalWinOrder, test.getFinalWinOrder());	True	False	Bug we must fix

Post condition(s) for Test:

test.getFinalWinOrder() should be equivalent to finalWinOrder, but is not. There is a bug.

Project Name: Project 1: Voting System
Team# 02

Test Stage: Unit x System

Test Date: 3/25/2024

Test Case ID#: RD_CPL_GTS_6A

Name(s) of Testers: Bethany Freeman

Test Description: Ensuring the ResultsDataCPL
toString creates the intended string

**Indicate where are you storing the tests (what file)
and the name of the method/functions being used.**
Project1/src/test/java/ResultsDataCPLTest.java

Automated: Yes X No

Results: Pass X Fail

Preconditions for Test: A ResultsDataCPL object has been created, as well as a StringBuilder object
which represents the expected output

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Assert that the toString of the created ResultsDataCPL object outputs the same string as the expected string	assertEquals(expected.toString(), test.toString());	True	True	

Post condition(s) for Test:

toString() of the ResultsDataCPL object outputs the proper string

Project Name: The project #, name of your system, and the team#

Test Stage: Indicate whether it is a unit test or a system test.

Test Date: The date the test was performed.

Test Case ID#: A unique ID is required. Decide on a naming convention and use numbering.
Example: Ballot_Shuffle_1

Name(s) of Testers: List the names of anyone involved in running this test case.

Test Description: Describe briefly the test objective.

Automated: Indicate if the test is completely automated or being checked manually. (If you have methods running the tests and checking results, select “yes”. If you are manually checking results, indicate manual by selecting the “no.”)

Results: Indicate if the test passed or failed.

Step #: You will be listing the test steps in order. This number is the step number in the process.

Test Step Description: Details of the test step.

Test Data: What the test data will be for this step. Be clear on what the input data will be. If using a specific file, be clear on the name.

Expected Result: What result are you expecting from the program component or system.

Actual Result: What result were returned based on the test.

Post condition for Test: What will be true after the test has been run? Has the state of the system changed in any way?

Notes: Comments and notes for you and your team members.
